Strawberries are plentiful in the Mont-omery market at thirty-five cents per

A man in Uniontown, Ky, is nursing a four-year-old century plant, and means to see t bloom. The Receivers of the Alabama and Chat-

nths behind in paying the employees. Mesers. Rogers & Co., of Palatka, Florida, shipped to two houses, one at Baltimore and the other at New York, from May to December last, 90,000 pounds of vanilla. It is worth, when dried, five cents per pound. It is packed in bales for shipment and is used to flavor smoking tobacco.

Galveston News: "The prairies are now a scene of beauty, surpassing even the imagination which drew the picture of the valley of Abyssinia. Millions of flowers deck ley of Abyssinis. Millions of flowers deck their green surfaces like beautifully variegat-ed carpets. If there is anything more lovely than a Texas prairie in the month of April we should like to know it."

Abbeville Press and Banner: "Thirteen Abbevitie Press and Banner: "Thirteen plows stood idle on the farm of our fellow-citizen, W. D. Mars, of Calhoun Mills, S. C., on the day of the hanging. All had gone, bag and baggage. There was not even, as of old, the resource of laughing girls whose sires had marched to Rome. All had gone, young and old, male and female."

According to an estimate made by the Paducah Kentuckian, the coal fields of Kenucky are not so extensive as in five other tucky are not so extensive as in five other States, their extent being about 14,000 square miles. Yet, owing to their accessibility and the f cility and cheapness with which they can be worked, they are estimated to be only second in value to Pennsylyania. It is calculated that there is enough coal in Kentucky to last for one thousand centuries.

Business men of Jacksonville, Fla., are on the qui vive, earnestly looking out for the Green Line tourists' train, which is expected that way via Chattahoochee, loaded down the practical men, who behold in Florida a hase for future operations. Receiver J. C. Greeley and other railroad official, are now endeavoring to run the Green Line freight through from St. Louis via Chattahoochee direct, saving the long delay by having the Western freight by Atlanta and other routes through Middle Georgia.

The New Orleans Picayune says: Yester-day we made inquiry of the intelligent Deputy Sheriff, Colonel Dick, what number Deputy Sheriff, Colonel Dick, what number of tenants paid rent to the sheriff. His answer was: "Over six hundred, and daily increasing." And this number has been acquired in one year. At a like ratio, in four years there is great danger that the sheriff will be the sole, as he is now the principal, landlord of the city. In the country it is even worse. More than half of all the properties in the parishes are under seizure for taxes. Not one-third of them would sell for smough to pay taxes and mortgages.

The Brownsville, (Tenn.) States tells this The Brownsville, (Tenn.) States tells this story: A singular termination to a courtship occurred at Stanton, in this county. A gentleman from North Carolina who, many years ago, knew a lady now living in Stanton, wrote to the lady, after an absence of fifteen years, asking her to marry him, and to keep it a profound secret. She complied with his request, and was making the usual preparations when he came from the Old North State the other day to carry out his part of the transaction, and on arriving at Stanton, he met a gentleman who congratuwith his request, and was making the usual preparations when he came from the Old North State the other day to carry out his part of the transaction, and on arriving at 14. A clergyman at Clarinda, Chio, was away from home when the crusade began. He returned in the evening, and saw his wife standing at the bar of a saloon singing as loud as she could yell. He supposed she was drunk, and entering the saloon, the test rolling down his face, he said: "Come home wife, you have ruined me-drunk-drunk-

London is literally built on a foundation of pipes. In some places it would be diffi-cult to find room to lay at other pipe. One gas company supplies two districts with nearly four hundred miles of pipes. Then there are the underground telegraph pipes, and 2,500 miles of drain pipes, the lead and item powering these three were the water. iron pasumatic tubes, the sewers, the water pipes, and the underground railway.

An act to protect and preserve the groves of big trees in Fresco, Tulase and Kern counties, California, was up in the Senate of that State recently, which Mr. Lindsey, Senator from those counties, moved to amend s that the act should apply only to trees over six feet in diameter. The amendment was accepted and the bili passed.

The Dallas ( Tex ) Herald has this: "We saw livered at the January Term, 1873. yesterday a full suit of buff silk clothes worr by George Washington, together with a pack-age of letters from him to his brother Sam-uel, varying from 1772 to 1784. They were at the bank of Adams & Leonard, en route from New York to Dr. Washington at Deni-son, Texas, he being a grand nephew of the

illustrious father of his country." The passengers who arrived in California on the 4 h of June, 1849, propose to celebrate n an iversary by holding festival reunion in San Francisco appropri ate to the occasion. A large number of me who have risen to positions of influence, and who have prospered in business; are included

in this band of argonauts. One curious and rigid custom, says a London letter, still prevails in Parliament, unde which one of the new members has been compelled to resign his seat. It appears that one of the business firms with which he is connected, as a leeping partner only, held a contract for carrying the mails in all of their steamers from the mainland to one of the little Scottish islands; and, although exact amount of pecuniary interests he has in the matter is forty-five dollars per annum, the fact is deemed sufficient to render it im

Mr. Max Strakosch, says the New York ng Post, has a pleasant address, is prompt, active and unceasing in his indus iry. He spears fluently Eoglish, French, German and Italian, and understands Span-ish, although he never made a special study of either. I his gift enables him to trats ic business readily with his numerous employees who, gathered from all quarters of the glo comprise as many tongues as led to the sus pension of work on the Tower of Babel. He somewhat of an anomaly among managers inasmuch as he never has tailed, but has always met every picuniary or other obliga-tion. He is unmarried.

## Coffee.

The holders of this important household article have been compelled to unlock their immense stocks, and the result is a marked decline in the prices of all grades. A few heavy importing houses of Boston, New York and Baltimore combined to control the market, and they had things pretty much their own way for a while. But the ring has been broken, to the joy of coffee-drinkers in all

Several causes have led to a turn in the market. In the first place, the high prices that have prevailed of late reduced the consumption one-third. The sales in London sumption one-third. The sales in London fell off from 1,200 tons a week to 350 tons a week to 350 tons a week, and, of course, stocks soon began to whom is married to a noble-salite Watson 3.2; Mary L. and Fred Bonna-salite Watson 3.2; M week, and, of course, stocks soon began to secumulate. The total visible supply in the United States is estimated at 250,894

MISCELLANEOUS

MAPPLETON'S AMERICAN CYCLOPÆDIA

New Revised Edition. stirely sewritten by the ablest writers on every subject. Printed from new type and

> illustrated with feveral Thousand Eccravings and Mape.

THE work originally published under the title of THE NEW AMERICAN CYCLOP. EDIA was completed in 1883, since which time the wide circulation which it has attained in all parts of the United States, and the signal developments which have taken place in every branch of sefence, iterature and are, never induced the editors and publishers to submit it to an exact and therough revision, and to issue a new edition entitled THE AMERICAN CYCLOP. EDIA.

Wishin the last ten years the progress of du a every department of knowledge has made ork of reference an imperative want. The movement of political affairs has kept pace with the discoveries of science, and their finitum sphitosion to the industrial and useful aris and the convenience and resiment of social life. Great wars and consequent revolutions have occurred, involving particularly appears of the convenience of national changes of peculiar moment. The civil was of our own country, which was at its seight when the last volume of the old work appeared has happily been anded, and a new course of commercial and in-dustrial activity has been commenced.

Large accessions to our geographical knowledge ave been made by the indefati unbie exporers of Africa.

The great political revolutions of the last decade with the natural result of the laps, of time, have brought into public view a multitude of new men, whose names are in every one's mouth, and of where lives every one is enrious to know the particulars. Great batters have been fought and important rieges ained, of which the details are as yet pres

paice in permanent and authentic history.

In preparing the present edition for the press, it has accordingly been the aim of the editors to bring down the information to the latest possible dates, and to firmush an accurate account of the most recent discoveries in science, of every fresh production in literature, and of the newest inventions in the practical arts, as well as no give a succinct and original record of the progress of political and historical creams.

The work has been becaus after long and careful reliminary labor, and with the most ample resources or carrying it on to a successful termination. None of the original aterectye plates have been sed, but every page has been printed on new type, arming in fact a new cyclopædia, with the same plan decompast of its predecesor, but with a fir greater scuniary expenditure, and with such improvements its composition sense been suggested by loftier sperience and enlarged knowledge.

experience and enlarged knowledge.

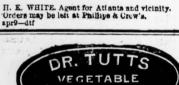

The linestrations which are introduced for the first time in the present coulon have been added not for the sake of pictorial effect, but to give greater lucidity and force to the explanations in the text. They embrace all branches of science and antural history, and or pictothe most fances and remarkable features of sciency, architecture, and art. as well as the various processes of mechanics and manufactures. Although intended for instruction rather than embelshment, no pains have been spared to igainst their attact excellence; the cost of intel execution is enormous, and it is believed they will fand a welcome reception as an admirable leature of the Cyclogedia. ons, and it is believed they will and a welcome re-ception as an admirable leature of the Cytop-chia, and wor by of its high character.

This work is sold to subscribes only, payable on delivery of each volume. It will be completed in sixteen large octave volumes, each containing about 100 pages, willy illustrated with several thousand Wood Engravings, and with numerous colored Litting graphic Maps.

[PRICE AND STYLE OF BINDING.

Five volumes now ready. Succeeding volumes, until completion, will be issued once in two mouths. \*.\*Specimen pages of the AMERICAN CYCLOP.EDI.
